

CARDXX INC. ANNOUNCES TERMINATION OF LICENSE AGREEMENT WITH INNOVATIER, INC.

Englewood, Colorado, October 3, 2007 -- Cardxx Inc. announced today that it had terminated its license agreement with Innovatier, Inc., relating to CardXX's license of its proprietary Reaction Assisted Molded Process and all related patents. CardXX has notified Innovatier, in writing, of such termination due to Innovatier's breach of certain of its obligations under the License Agreement and its failure to cure such breach within the cure period provided in the license agreement. Such termination is effective immediately.

As a result of CardXX's having entered into a Technology License Agreement with Identita Technologies International SRL as of July 3, 2007, and the termination of CardXX's license agreement with Innovatier, Identita is now the sole and exclusive licensee of CardXX's Reaction Assisted Model Process and all related patents.
